Garbin 104PX Vapor Convection Oven

Stainless Steel, inside and outside with double humidifier. Three fans.

“... twenty-five years ago my mothers tart had a very appetizing look, but she could not cook it because the oven was broken. I couldn't immediately find a technician available, so I had to try to fix the oven by myself. I managed to do it and I really liked it. It was with great satisfaction to see, once again to see the whole happy family gathered around mothers tart ...”

That,s how Garbin Srl was born: starting by building ovens in spare time, then professional ones, first small and then bigger and bigger, more and more sophisticated and technologically a state of art.

Since then Garbin have been producing and selling a lot of ovens, all UE certificated and distributed in 56 different countries.

There are many styles of optional stands available.
